SCelta DELLE TINTE

Per rappresentare in maniera completa e al contempo sintetica lo spazio del colore e per aiutare nella scelta degli abbinamenti, questa selezione di tinte è divisa in più aree cromatiche di colori coordinati, in grado di generare accostamenti armoniosi quando selezionati all'interno dello stesso gruppo cromatico, inteso come riga, colonna, facciata.

POSSIBILITÀ DI UTILIZZO

I colori di questa collezione sono realizzabili in prodotti molto diversi e sono pertanto da intendersi come indicativi, per questo motivo si suggerisce la verifica della tinta prima dell'applicazione.

Su superfici estese si raccomanda l'utilizzo di prodotti dello stesso lotto di fabbricazione.

Le tinte della selezione COLOR EXPERIENCE sono riproducibili con i sistemi tintometrici Ard. La qualità della finitura ottenuta dipende molto dal rispetto delle condizioni indicate nella Scheda Tecnica del prodotto, con particolare riferimento alla corretta preparazione del supporto e alla scelta di eventuali fondi.

Le differenze fra natura chimica, strutture superficiali e opacità possono causare lievi differenze di tonalità tra prodotti diversi formulati nello stesso colore.
